

# Trouble getting your carts to the road?

If you have a hard time getting trash, recycling, and yard waste carts from your residence to the weekly roadside collection area the *CANSPORTER* can simplify this difficult task. The *CANSPORTER* is a cart lifter and carrier that attaches to your vehicle's tow receiver. Just wheel the cart to the *CANSPORTER* and with a minimal shove of the cart, the cart is lifted up off the ground and latched in place for transport. Additional securing of the cart is not required. The cart is ready for transport. Simply reposition a lever to lower the cart. The cart remains latched in the upright position until you push

the cart forward, unlatching the *CANSPORTER* and allowing the cart to be controllably lowered to the ground. It couldn't be simpler. It takes only seconds to load or unload your cart. Both single and dual cart carriers are available.

## TRANSPORTING YOUR CARTS TO AND FROM THE COLLECTION SPOT CAN BE CUMBERSOME

With the *CANSPORTER* you will not:

- Lift the full weight of the cart. -- *Only minimal effort is required to position the cart for transport.*
- Spill trash inside your vehicle. -- *The cart is transported outside your vehicle and is held upright.*
- Tie down the cart for transport. -- *Easy on, Easy off.*
- Get rained on walking your cart to the collection spot. -- *You are inside your vehicle, the cart is outside.*
- Get dirty lifting your cart. -- *Only your hands touch the cart handle.*

You transport your waste carts to and from the collection spot over 100 times each year. You deserve the convenience of the *CANSPORTER*.

Transports residential semi-automated carts of all sizes and capacities.

## **Cansporter Waste Cart Carrier** THE CONVENIENT WAY TO TRANSPORT YOUR WASTE CARTS
